## ***Maternity Kits for mothers and babies***

*Having a baby should be a time of joy as a new life comes into the world. But for many of the poorest of the world it is a time of concern and worry and uncertainty. Questions such as "how will I manage?", "how can I get food for my baby?", "how will we survive?" replace the excitement of new birth.*

*In Romania this is a major issue for mothers and babies from poor villages. The sort of pre and post natal care which is regarded as normal in many developed countries is very poor or non-existent in outlying areas of Romania and even in some towns. Even if people have the money, many items are just not able to be purchased locally.*

*Casa Vietii helps women in the difficult decisions about abortion but also tries to support those with small babies. Together with the UK charity AMEN we have launched a project to provide maternity kits for young mothers with their babies.*

*A typical maternity kit includes:*

- Pregnancy vitamins
- Nipple cream
- Cotton wool
- A Bottle
- Calpol
- Vaseline
- Some Nappies
- Sudocrem
- Bonjela
- Baby tights
- All-in-one
- Baby bath
- Baby shampoo
- Baby wipes
- Sleep suit
- Vests

*Thanks to the generosity of AMEN supporters we have already been able to supply over 30 of these kits to very needy mothers. They are very thankful for the love and thoughtfulness shown to them.*

*Jill and Sorin*
